

## **EMERGENCY PLANNING FOR THE HOME CARE CLIENT/PATIENT**

This pamphlet has been provided by Kids Korner Medical Supply (KKMS) to help you plan your actions in case there is a natural disaster where you live. Many areas of the United States are prone to natural disasters like hurricanes, tornadoes, floods, and earthquakes.

Every client/patient receiving care or services in the home should think about what they would do in the event of an emergency. Our goal is to help you plan so that we can try to provide you with the best, most consistent service we can during the emergency.

### **Know What to Expect**

If you have recently moved to this area, take the time to find out what types of natural emergencies have occurred in the past, and what types might be expected.

Find out what, if any, time of year these emergencies are more prevalent.

Find out when you should evacuate, and when you shouldn't.

Your local Red Cross, local law enforcement agencies, local news and radio stations usually provide excellent information and tips for planning.

### **Know Where to Go**

One of the most important pieces of information you should know is the location of the closest emergency shelter.

These shelters are opened to the public during voluntary and mandatory evaluation times. They are usually the safest place for you to go, other than a friend or relative's home in an unaffected area.

### **Know What to Take with You**

If you are going to a shelter, there will be restrictions on what items you can bring with you. Not all shelters have adequate storage facilities for medications that need refrigeration.

*We recommend that you call ahead and find out which shelter in your area will let you bring your medications and medical supplies, in addition, let them know if you will be using medical equipment that requires an electrical outlet.*

During our planning for a natural emergency, we will contact you and deliver, if possible, at least one week's worth of medication and supplies. Bring all your medications and supplies with you to the shelter.

### **Reaching Us if There Are No Phones**

How do you reach us during a natural emergency if the phone lines don't work? How would you contact us? If there is warning of the emergency, such as a hurricane watch, we will make every attempt to contact you and provide you with the number of our cellular phone. (Cellular phones frequently work even when the regular land phone lines do not.)

If you have no way to call our cellular phone, you can try to reach us by having someone you know call us from his or her cellular phone. (Many times cellular phone companies set up communication centers during natural disasters. If one is set up in your area, you can ask them to contact us.)

If the emergency was unforeseen, we will try to locate you by visiting your home, or by contacting your home nursing agency. If travel is restricted due to damage from the emergency, we will try to contact you

through local law enforcement agencies.

### **An Ounce of Prevention...**

We would much rather prepare you for an emergency ahead of time than wait until it has happened and then send you the supplies you need.

To do this, we need for you to give us as much information as possible before the emergency. We may ask you for the name and phone number of a close family member, or a close friend or neighbor. We may ask you where you will go if an emergency occurs. Will you go to a shelter, or a relative's home? If your doctor has instructed you to go to a hospital, which one is it?

Having the address of your evacuation site, if it is in another city, may allow us to service your therapy needs through another company.

### **Helpful Tips**

- Get a cooler and ice or freezer gel-packs to transport your medication.
- Get all of your medication information and teaching modules together and take them with you if you evacuate.
- Pack one week's worth of supplies in a plastic-lined box or waterproof tote bag or tote box. Make sure the seal is watertight.
- Make sure to put antibacterial soap and paper towels into your supply kit.
- If possible, get waterless hand disinfectant from Kids Korner Medical Supply (KKMS) or from a local store. It comes in very handy if you don't have running water.
- If you are going to a friend or relative's home during evacuation, leave their phone number and address with Kids Korner Medical Supply (KKMS) and your home nursing agency.
- When you return to your home, contact your home nursing agency and Kids Korner Medical Supply (KKMS) so we can visit and see what supplies you need.

### **For More information**

There is much more to know about planning for and surviving during a natural emergency or disaster.

To be ready for an emergency, contact your local American Red Cross or Emergency Management Services agency.

### **An Important Reminder!!**

*During any emergency situation, if you are unable to contact our company and you are in need of your prescribed medication, equipment or supplies, you must go to the nearest emergency room or other treatment facility for treatment.*
